

20th May 2020

Dear children and families

Google Classroom

I hope that this letter finds you all safe and well,

As a school we have made the decision to streamline the process of sharing our online home learning activities between the children and their teachers. We will be using the popular, free web service called **Google Classroom**, which will allow the children to submit work and receive feedback from their teacher on a variety of different assignments. In order to use the features you will receive the following communication from us in the coming days:

1. You will be sent your child's unique username and password to access their school Google account (please keep this safe for future reference)
2. You will be sent a code so that your child can join their school class
3. The first activity will be placed in your child's Google Classroom account on Monday 1st June

A guide containing login instructions has been placed on our website in the 'Letters Home' section and will come in very handy when you access your child's account for the first time.

Paper packs will still be created for those who have no access to our online learning opportunities.

I would like to offer a huge 'Thank You' to all our parents and families who continue to show great support with home learning.

Mr McMulkin
